DESERT FLOWER

(306 Lins 1958)

(Bo Peep X Seedling)

A beautiful, new, rich, ruffled cream with buff lower petals. Is pale green deep in the throat and has pure white stamens.

The color blend reminds one of Ocean Spray, however DESERT FLOWER makes a good straight tall spike with a 16-18 bud flower head, opening 6-7 RUFFLED, richly colored florets, which are well attached and well placed. A beautiful glad for arrangements and cutflowers, for home enjoyment. It is an easy propagator and blooms early midseason.

WHITE BIRD OF PARADISE

(Lins 400 1958)

As predicted, Bird of Paradise is a good pollen parents. We have several good seedlings of it coming on but this one impressed us and also Mr. Sommer (The Originator of Bird of Paradise) so much that Mr. Sommer gave his permission to name it WHITE BIRD OF PARADISE.

It is a heavy textured clean 400 size, flat, saucershaped white with the genuine Bird of Paradise center, bent stamens and all.

A floret of this makes a corsage, just as it is, just pin it on.

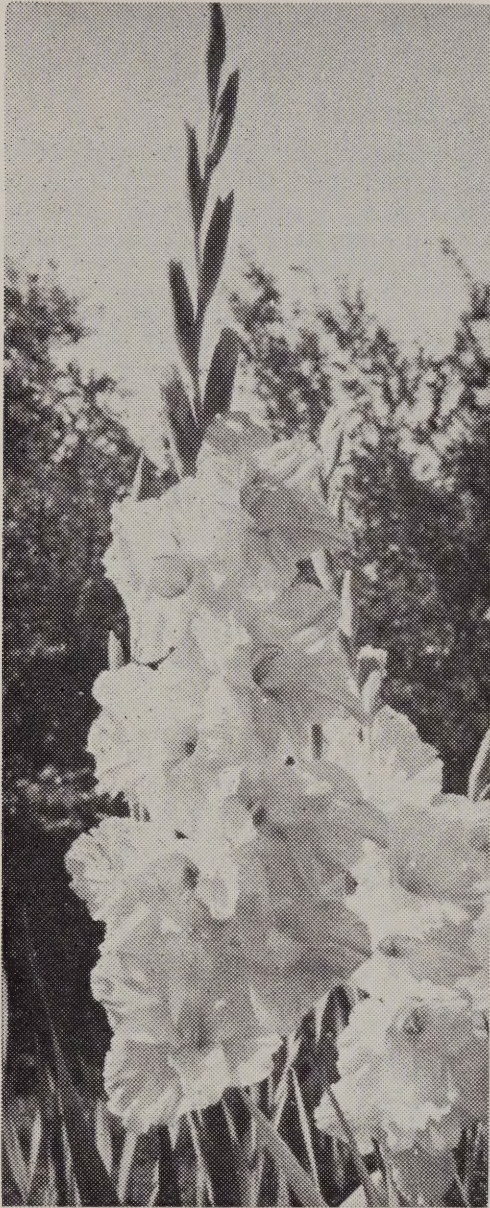

Bird of Paradise Does Not set seed but WHITE BIRD OF PARADISE DOES set seed and it's pollen DOES fertilize other varieties.

Although it is a good propagator and it's bulblets do grow easily, it would take several years to build up enough stock to offer bulbs.

Realizing that hybridizers would be glad to get even a bulblet NOW, of so valuable a breeding variety, we consented to share our good fortune by letting out a limited amount of it's bulblets, with a limit of two bulblets to a customer.

Parade bts. and other valuable stock, was expressed from here in Feb. 1957. Unfortunately the shipment was lost or stolen enroute.

We had hoped to have enough Congo for 1958, to allow a lower price, however due to this loss the supply is still short.

Far East

(410 Lins 1957)

Parentage: (White Tower X Spotlight)

Beautiful, large, wide open, ruffled and waved Chartreuse Yellow with small flame spot. Substance is like plastic and color penetration is perfect. Is still as thrilling now as it was the first time it bloomed as a seedling. As a breeder it is producing clean ruffled Chartreuse seedlings. Opens 7-8 perfectly placed bloom on 4 ft. plants. One of those beautiful varieties one never has enough of.

Congo

(554 Lins)

In describing this, we can do no better than quote Mr. Sydney Mode's article "LIVE MODERN" in the N.A.G.C. BULLETIN No. 48.

Quote: "We had a very interesting time watching the black reds perform this year as we had added to our collection many recent introductions including the 1956 releases. The stand-out in this class over all varieties was CONGO, a gorgeous giant. We grew numerous spikes which opened nine and ten immense florets actually measuring over six inches, on heads of twenty-two to twenty-six buds. Unlike most giants, the florets were perfect in placement and very securely attached. The petals showed no ruffling but are so glossy, velvety and thick that they present a rare spectacle. Combining this grand bloom with it's fine plant habits and unusual health, you then have one of the season's outstanding glads." End of quote.

To hasten propagation, we arranged to have all the large Congo bulblets grown in California for us. The shipment of Congo bts., plus Hit

Sweetest Maid

(430 Lins)

Parentage: (Elizabeth The Queen X California X Aladdin)

Easily one of the most beautiful varieties in existence today.

Makes a grand spike of heavily ruffled, flat, wide open bloom in delicate salmon. Easily opens 8 perfectly placed and perfectly attached bloom on 18-20 bud flower heads on 50" plants.

Was rated EXCELLENT in official N.A.G.C. trials. Reports indicate it is a knock-out in all sections of the country. It is a first class exhibition flower, in fact most we grew last year, were of show calibre, grown without any special treatment. A 5XX variety for any purpose.

Sable

(370 Lins)

Parentage: (Royal Robes X Burma)

Heavily ruffled glowing purple of such heavy plastic like texture and color penetration, they seem carved of purple wax. Has an excellent rating in NAGC tests. Experts who know, rate SABLE the best and prettiest purple in it's class. Blooms late midseason. Is an easy fast propagator. We had numerous show calibre spikes last season with 8 open on 18-19 bud flower heads on 4 ft. plants.

A 5XX variety for any purpose.

Small, ruffled, heavy textured, beautifully formed, greenish cream, blending to pale green deep in the throat. Just grand for arrangements. Blooms early on 3 ft. slender plants. Is a fast propagator but it's bulbs do not seem to grow large.

Parentage: (Burma X Royal Robes)

Very ruffled, velvety, heavy textured black red. Opens 5-6 perfectly placed and well attached bloom on 4 ft. always perfect plants. Those who like ruffled dark glads will love Sumatra. We understand SUMATRA was grand champion in Kentucky last summer. **L 35c, 5 for \$1.40**

Dream Queen

(432 Lins)

Parentage: (Eliz. The Queen X Dream Castle)

Warm deep rosy salmon pink with that desirable Gloxinia like stippling in rose lavender on lower lip. The color is rich and it's plant habits are good. Opens 8 five inch well attached bloom on 18-20 bud flower heads on 50" plants. **L 35c; M 25c**

Bird Of Paradise

506 Sommer-Koerner

This giant creamy apricot novelty is one of the most popular varieties. Nothing just like it in the glad world. The giant bloom, often 8 inches across, is formed like a Christmas Poinsettia, with all petals of about equal size. The heavy textured narrow petals are ruffled and lacinated. Has an odd center of red with stamens peculiarly formed, unlike any other glad. It's pollen used on other varieties has produced some interesting seedlings. See WHITE BIRD OF PARADISE in this catalog. **L 50c; M 40c; S 25c; Bts. 8 for 25c**

Green Ice

(390 Barker)

Greenish cream at petal edges, shading much deeper inside. The color is similar to Limeade but is more of the exhibition type. Opens 8-10 of it's 20 buds on tall plants.

A beautiful and different variety. Is valuable as a breeder. It transmits it's color and deeper shades of green to it's seedlings.

BLUE DRAGON (Gosling 1958) A tall light blue dragon whose petals are finely lacinated and edged with spurs. It will open 7 lovely pale violet florets of it's 16 buds but those thorny buds above are as lovely as the open florets. I am more than proud of this stately beauty. **Any Size Bulb \$3.00**

DOUBLE CREAM (Gosling 1958) This one is in the shape and growth of Koerner's Multipetal but is a lovely creamy white, flecked lavender on it's petal edges. Most of it's 10 florets will open at once. Those double florets, full as a carnation, will entrance you. **Any Size Bulb \$2.00**

DOUBLE GOLD (Gosling 1958) This semi-double, has golden yellow petals, streaked with orange. Six open, balance of buds in color. To give your garden a vivid accent, plant some DOUBLE GOLD. It's striking color and shape really makes it stand out. **Any Size Bulb \$2.00**

ELIZABETH THE ORCHID (Gosling 1958) This is that old favorite Elizabeth The Queen in exquisite flaring florets, in the orchid effect. Though only 5 of it's 12 buds open at a time, those bristling lavender buds will enchant you. Try this one on your florist. **Any Size Bulb \$2.00**

GOLDEN WEDDING (Gosling 1958) A delightful bright clean yellow in the Wedding Day effect. It's spike is filled with daintily folded and crinkled florets with many spurs on the reverse side of the petals. Though the florets are large, the petalage is so delicate and dainty, it could pass for an orchid. This is truly a dream of beauty and should be invaluable to florists. **Any Size Bulbs \$3.00**

ROSY DREAMS (Gosling 1958) The shade and shape of Rose Orchid but on a tall stately spike that will open 8 of it's 18 buds at a time. This is one of the taller Dragons and should be a thrill to those glad fans who love the rosy shades. **Any Size \$3.00**

STARLIGHT (Gosling 1958) A bright light red Dragon with white spurs on the buds. Inner face of the open flowers shows all red but the unopened buds are all abristle with those white spurs like the Evening Star, when the sinking sun sets it afire in the western sky. This is truly a curious and exquisite novelty. **Any Size Bulb \$3.00**

Dragons » Doubles « Novelties

CORSAGE (361 Knight) Sharply lacinated 3½ to 4 inch, narrow petaled, ruffled and curled creamy pink, blending to rose toward petal edges. For corsages and arrangements. Due to its heavy substance it lasts a long time out of water.

DINOSAUR (550 Gosling) Large, artistic, informal, spurred doubling blossoms in a deep rose scarlet salmon blend. L 35c; M 25c

DOUBLE SPIRE Makes a regular height plant and flower head. The rose lavender double bloom, which resembles a double Hollyhock, is double all the way up the spike. Bts. 40c, 3 for \$1.00

FAIRY GIANT (560 Gosling) Originator's description: A seedling of Fairy Dragon and White Dragon. 6-8 huge florets, feathered pink on lavender base with spurs pointing backward and 4-5 extruded bristling buds in color. Our own observation is that like most Dragons this is variable, some blossoms have more spurs than others. L \$2.00; Small 75c; Bts. 4 for \$1.00

FANTASY (430 Rich) Large ruffled, folded, curled and spurred, heavy textured florets in a blend of salmon, cream and light green. Plants are tall with long flower heads. L 25c

GLORY DRAGON (507 Gosling) A large creamy yellow sport of Salmons Glory, which shows some spurs and which sets seed easily. L 75c

MANY PETALS (Gosling) Do not confuse this with MULTIPETAL. This is a heavy textured globular, curled and spurred double deep rose. Stock is scarce. L \$2.00; M \$1.50; S 75c

MULTIPETAL (Koerner) This is the pollen parent of most doubles and dragons available today. The color is creamy light yellow and as the name implies it has many petals. Since most glad fans are now growing seedlings, many will want to try their luck for DOUBLES AND NEW TYPES. Get enough MULTIPETAL and BIRD OF PARADISE bulbs, so you can plant at intervals, use the pollen on your favorite regular glad. L 35c; Mixed Sizes 10 for \$2.00

RELUCTANT DRAGON (Gosling) This is a ruffled and spurred orange salmon and yellow dragon. Scarce. L \$1.00

ROSE ORCHID (Gosling) This, in our opinion is a real 5X novelty. The doubling florets are ruffled, curled and heavily spurred, in a rose orchid shade. L \$1.00

SHAGGY DRAGON (Gosling) This novelty Dragon, in a salmon and orange blend is something nice for exotic arrangements. Many of its blossoms are double besides having spurs. Being a good propagator it can be offered at a lower price. L 25c; M 2 for 30c; Mixed Sizes 10 for \$1.00

WEDDING DAY (Koerner) Pure white. There are many types of bloom among Wedding Day. Some are spurred, some are sharply lacinated, some are tulip shaped. If we had time we would make selections and later offer the various types, however you can make your own selections and propagate your favorite type yourself. We have seen some very beautiful wedding bouquets and arrangements made of this. This will give your arrangements that artistic touch. Nothing just like Wedding Day. L 20c; Mixed Sizes 10 for \$1.00

Testimonials

Among the SEEDLING BULBS I bought from you in 1953, I found a very fine pink. It proved to be a good seed and pollen parent. K. W. Harms, Iowa.

Your No. 465TRR, (now SUMATRA) is surely a beautiful glad. I haven't seen anything in quite its color, being darker and deeper than Burma. The velvety texture, heavy ruffling and round flat open florets are very attractive. It makes large healthy bulbs and many bulblets. Mrs. Clifford Tullar, New York.

Testimonials

I wish to thank you for the beautiful and wonderful glads. Their beauty drew many favorable comments. Yours were some of the best. I was pleased with the premium bulb of WHITE ORCHID. Donald Puckett, Ohio.

Your bulbs produced marvelous stalks and lovely blossoms for me last year. I am enclosing some color prints of my glads that your bulbs produced for me in April and May. I thought perhaps you would like to see the kind of results your bulbs have in Texas. Mrs. J. B. Jackson, Texas.

The bulbs I received from you grew well. I was impressed with your generous extras. Your ORIENTAL BLOND was beautiful with 23 buds, 10 open, 8 in color. I crossed it with Rosita and got 18 fine seed pods. Your 465 TRR, (now SUMATRA) was also extra nice. R. W. Cooley, Mich.

This unlabeled collection is made up of the darker shades, including some lovely ruffled velvety reds and maroons. Worth many times the price at which they can be had in this collection.

4X Seedling Bulbs

We grow a great number of seedlings each year. In 1956 our seed crop from hand polonized, labeled crosses, amounted to perhaps $\frac{1}{2}$ million seed. Of course some years the crop is smaller, depending on weather conditions etc.

When these seedlings come into bloom, only the few that seem outstanding are marked for further consideration. All the rest are put into a grand 4X mixture.

In as much as most seedlings do not show their true value the first time they bloom, a great percentage of the bypassed seedlings are better than the ones kept the first blooming.

If we could grow the lot again we would find as good a percentage of outstanding seedlings at the second blooming, but we have to make room for the new seedling crop coming on each year.

Growing seedlings is fun because you never know what will show up tomorrow.

If you find one you would like to name, which is not at all unlikely, that seedling is yours, to do with as you please.

Amaryllis

Several years ago we listed Amaryllis bulbs in our catalog. The bulbs were procured from regular commercial sources. We bloomed some of these bulbs and were disappointed. Next we purchased Amaryllis bulbs from a different source with again disappointing results. We then decided, that, if we could not offer our customers, more beautiful Amaryllis, than those we were able to buy from known sources, we would discontinue listing them.

However, since Amaryllis have always intrigued us, we collected the best named varieties from Amaryllis specialists abroad and started our own breeding program. The resultant seedlings are thrilling. We have them in white, all shades of pink, rose, salmon and reds from scarlet to maroon. Most have not yet bloomed. We know there are gems among these unbloomed Amaryllis seedlings and we decided to let our customers in on some real excitement growing unbloomed seedlings. The large bulbs should bloom soon after planting. The medium bulbs will perhaps bloom as quickly, if not, they will bloom later. The small bulbs must be grown on to blooming, which should not take too long. Growing instructions included with the bulbs.

L \$2.50; Medium \$1.50, 5 for \$6.00; Small 75c, 5 for \$3.00

Why Should We Plant Peonies?

MARCELLA

HERE ARE SOME REASONS:

They are rated among the most beautiful of all plants, both in plant and flower. They are easy to grow. Magnificent flowers may be produced with less care than that given almost any other flower, though they well repay reasonable loving attention. It is long-lived. An established plant will live and bloom for many years.

THEY ARE HARDY IN EVERY STATE IN THE UNION
AND IN ALL OF CANADA.

They may be grown in beds, borders or gardens by themselves or with other plants. They make attractive specimen plants on the lawn or in the garden. The blooms are large, showy, of many forms and colors and long lasting. Many varieties are deliciously fragrant. Disease and insects rarely bother them. They make excellent cut flowers and give beautiful landscape effects. In short it is one of the most useful, beautiful, versatile, and altogether satisfactory plants known.

IT IS TRULY THE KING OF FLOWERS!

PEONIES

The peonies we offer are not the cheap run of the mill varieties but are the best available today. Most have received the AMERICAN HOME ACHIEVEMENT MEDAL or similar awards. They not only have beautiful bloom with a charm all their own but most have strong stems which hold the bloom off the ground.

These famous peonies will grace the finest estates. At the recent Minn. peony shows, LINS ORIGINATIONS won, against all comers, 4 DOUBLE COLOR CHAMPION AWARDS, out of 5 possible. In class 100B, five Lins originations won the SILVER MEDAL. GARDENIA was GRAND CHAMPION of the show in 1956 and 1957.

Nothing better in peonies to be had.

Peonies can be planted in spring or fall. We have roots of some varieties in storage for early spring planting. For fall planting, shipment in fall.

BLUE ROSE (Lins 1957) A very large full double bluish rose, which carries more blue color than any peony we know of. Has a strong sweet rose fragrance. Stems are not as strong as most other Lins originations. Visitors always admired this peony, referring to it as the "BLUE PEONY". — **\$10.00**

BURMA (Lins) Beautifully formed double deep red. Has won highest honors on the show table and is also a good garden flower. Until the plant is fully established the bloom is a beautiful semi double with golden stamens. Was CHAMPION RED again in 1956. Blooms early midseason — **\$3.95**

CASABLANCA (Lins) A giant full double pure white with buds as big as door knobs. The stems are strong and hold the giant beautiful bloom erect. This is one of the grandest peonies. One you will be proud to own. We grew thousands of seedlings and had other large double whites but unless a giant has heavy stems and unless the bloom is beautifully formed the variety is worthless. CASABLANCA is a perfect peony in every way. Blooms late midseason. — **\$5.95**

DOLORODELL (Lins) A super peony with strong heavy stems which hold the giant full double bloom erect. The color is an unfading rich salmon pink. An AMERICAN HOME ACHIEVEMENT MEDAL winner. Makes a perfect plant and each year, early in the blooming season, is loaded with giant Gardenia like bloom. Cut in bud and opened inside the color is pale flesh. Opened on the plant it is white. Must be seen to be appreciated. Was CHAMPION FLESH many times. Was GRAND CHAMPION of the show in 1956. In 1957 one bloom of GARDENIA was CHAMPION FLESH, another bloom of GARDENIA was the GRAND CHAMPION of the show. — **\$3.95**

HAWAIIAN SUNSET (Lins 1958) A beautiful new JAPANESE type in rose and gold. The richly colored bloom is carried on perfect stems on a perfect plant. A rich rosy pink with a large high center of narrow golden petaloids. — **\$10.00**

LILAC TIME (Lins 1958) A new Japanese type peony, in a new color. A rich deep lavender lilac. The collar and the center cluster of narrow and lacinated petaloids are the same rich color. These richly colored bloom are carried on good stems on a good plant. Something different and wonderful for bouquets and arrangements. It's buds look like rose buds. — **\$10.00**

PEONIES (continued)—

MANDALEEN (Lins) One of the few peonies, which, besides being beautiful, also has a strong sweet rose fragrance. The plant is tall. The stems are foliated way down. MARCELLA (Lins) Medium sized full double white with strong heavy stems. The substance is so heavy and the bloom so fully double that a dozen bloom of Marcella have surprising weight. A perfect plant loaded with lovely bloom every year. AMERICAN HOME MEDAL WINNER. — **\$4.95**

MINNEKADA (Lins) A Japanese type peony in an unusual different color. The collar is lavender with the center cluster of petaloids flame rose. The carpels are green, tipped white. To preserve this beautiful color the bloom should be developed inside. — **\$3.95**

The plant is tall with long willowy but adequate stems, each crowned with a large bloom, often 8-9 inches across. Opens pale pink and when fully open is a beautiful ivory. In our opinion is one of the most beautiful peonies. — **\$4.00**

Experts proclaim PAUL BUNYAN one of the very best new peonies. First shown in 1955 and was awarded the AMERICAN HOME ACHIEVEMENT MEDAL. Existing stock is not large.
